

# Fact Sheet

Governments of Michigan Investing Cooperatively (“GovMIC”) is the marketing name used to describe a class of shares of the MILAF+ Portfolio of the Michigan Liquid Asset Fund Plus (“MILAF+” or the “Trust”), which is a comprehensive cash management program created in 1987 by the Michigan Association of School Boards.

## MILAF+ PORTFOLIO – GOVMIC CLASS

The MILAF+ Portfolio is a short-term liquid portfolio and cash management vehicle rated AAAM<sup>4</sup> by Standard and Poor’s. The GovMIC Class offers a competitive rate exclusively for governmental entities, including counties, municipalities, and townships/villages under the State of Michigan’s Public Act 20.

## INVESTMENT OBJECTIVE - MILAF+ PORTFOLIO

To earn a high rate of return while preserving principal, providing liquidity and seeking a stable NAV of \$1.00.

## INVESTMENT PHILOSOPHY

Through diligent market analysis and careful duration management, we can help public agencies, typically limited to a conservative investment universe, maximize their income potential while maintaining stability of principal and liquidity.

## GovMIC Class Performance (30-Day Net Yield<sup>5</sup> %)

<sup>1</sup>7-day net yield, also known as the current annualized yield, represents the net change, exclusive of capital changes and income other than investment income, in the value of a hypothetical account with a balance of one share (normally \$1.00 per share) over a seven-day base period expressed as a percentage of the value of one share at the beginning of the seven-day period. This resulting net change in account value is then annualized by multiplying it by 365 and dividing the result by 7.

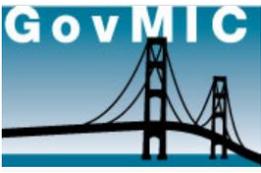

<sup>2</sup>The monthly distribution yield represents the net change in the value of a hypothetical account with a value of one share (normally \$1.00 per share) resulting from all dividends declared during a month by the Pool expressed as a percentage of the value of one share at the beginning of the month. This resulting net change is then annualized by multiplying it by 365 and dividing it by the number of calendar days in the month.

<sup>3</sup>Weighted Average Maturity: Calculated by the final maturity for a security held in the portfolio and the interest rate reset date. This is a way to measure a fund’s sensitivity to potential interest rate changes.

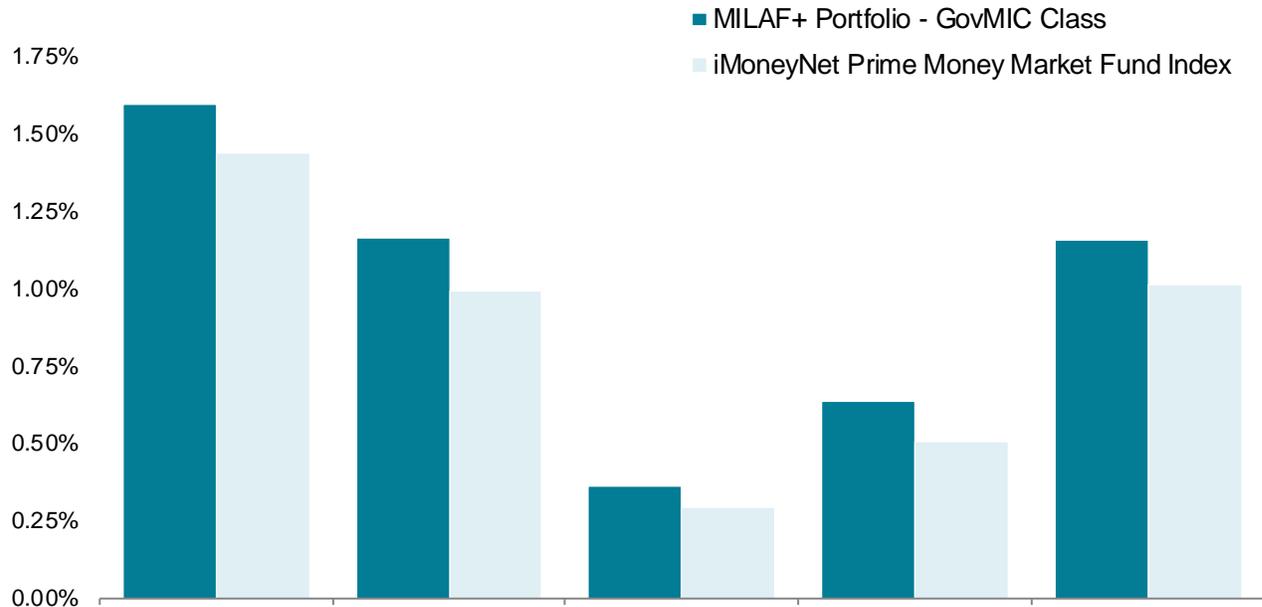

<sup>4</sup>Standard & Poor’s fund ratings are based on analysis of credit quality, market price exposure, and management. According to Standard & Poor’s rating criteria, the AAAM rating signifies excellent safety of investment principal and a superior capacity to maintain a \$1.00 per share net asset value. However, it should be understood that the rating is not a “market” rating nor a recommendation to buy, hold or sell the securities. For a full description on rating methodology, visit Standard & Poor’s website ([http://www.standardandpoors.com/ratings/en\\_US/web/guest/home](http://www.standardandpoors.com/ratings/en_US/web/guest/home)).

<sup>5</sup>As of the last day of the month. The 30-day yield represents the net change, exclusive of capital changes and income other than investment income, in the value of a hypothetical account with a balance of one share (normally \$1.00 per share) over a thirty-day base period expressed as a percentage of the value of one share at the beginning of the thirty-day period. This resulting net change in account value is then annualized by multiplying it by 365 and dividing the result by 30.

<sup>6</sup>Percentages may not add to 100% due to rounding.
